SIZE：1200*600MM / 2-4MM /

Travertine sx007
002(NO Yellow tile colored)
SIZE：1200*600MM / 2-4MM /

ADVANTAGE

INSTALLATION EFFECT

High-quality choice materials for commercial space

Breathable, durable, crash-resistant, suitable for high-altitude buildings, special-shaped buildings, space renovation of old cities, etc.

As a new type of building material, soft stone breaks the inherent hardness of ceramic tiles.
The soft stone brick has a very soft texture, a strong three-dimensional feeling, and a high change.
The cold and hard texture of the traditional rock makes the home environment more warm.
